Detailed Business Process Workflows

In-Stock Process / Expiry & FEFO Execution (ISP)

The In-Stock Process governs how inventory is managed within the warehouse, handling batch allocation, quality checks, spoilage/damage write-offs, and order fulfillment based on shelf-life rules.

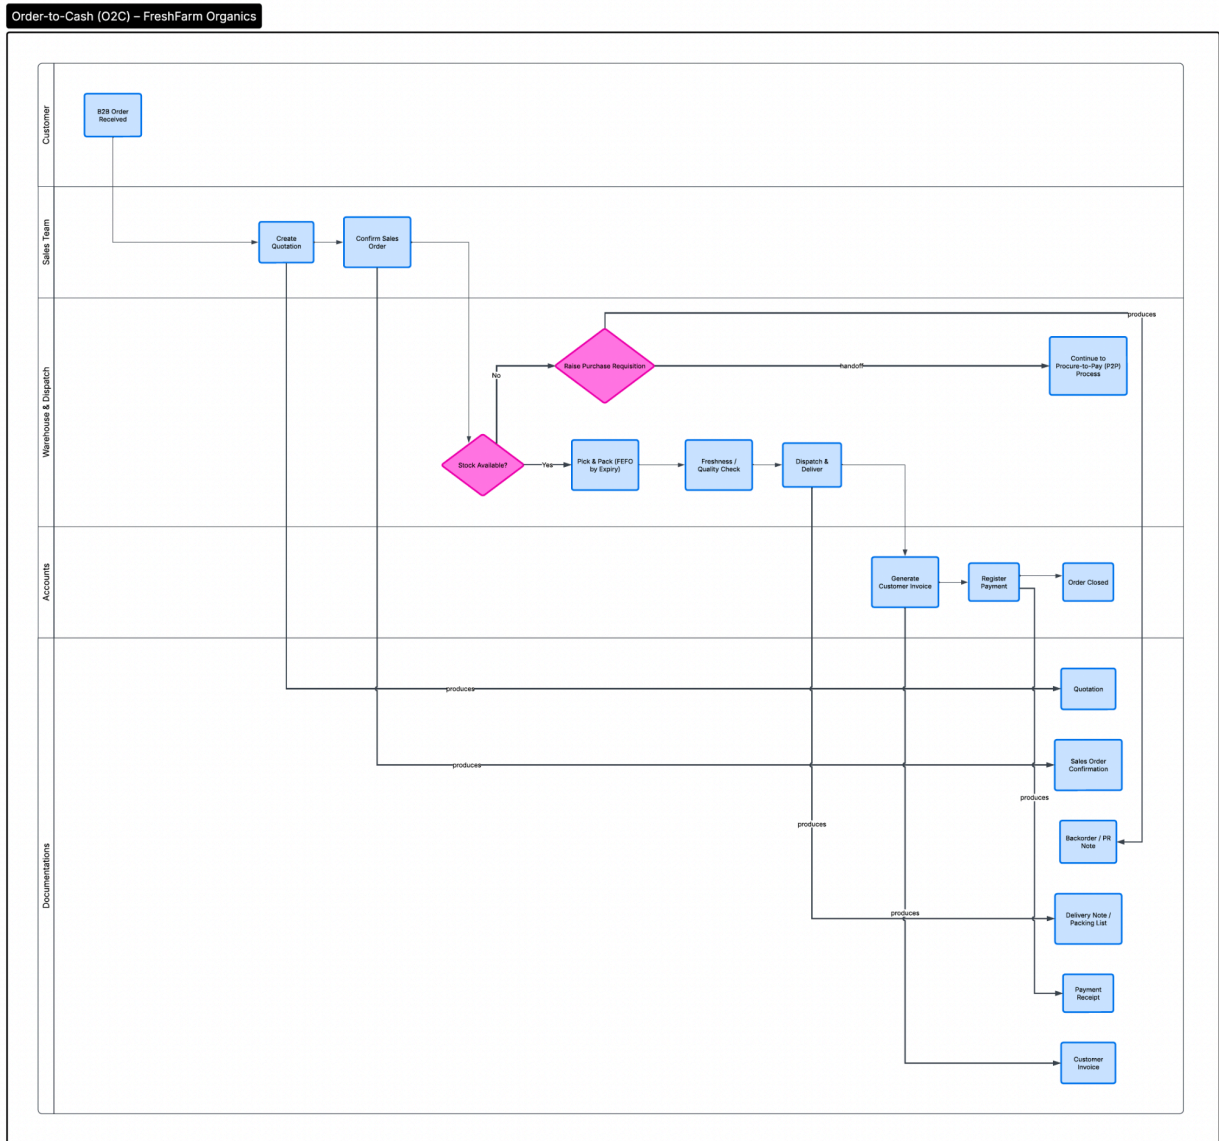

Department / Role	Process Steps & Key Operational Activities
Warehouse	- Batch Received into Warehouse. - Store by Zone / Cold Storage (FEFO Tagging at Ambient / Temperature-Controlled / Frozen zones). - Check Expiry: If Expiry Passed → Trigger Spoilage / Write-off; If Expiry Valid → Normal FEFO Allocation for Goods. - Batch Stocked and made available

Department / Role	Process Steps & Key Operational Activities
	for allocation.
Quality Assurance (QA)	• Inspect Lot / Batch No., Harvest Date & Organic Certificate. • Assess Freshness (FEFO) & Set Shelf Life. • Validate Grade / Certificate. • Perform Expiry Check / Freshness Assessment. • If Quality / Expiry Fails: Conduct Normal Spoilage & Write-off → Generate Damage / Write-off Report. • If Quality / Expiry Passes: Proceed to priority allocation and dispatch. • Generate Batch Traceability Report & Batch Status/Audit Report → Ensure Batch Closed & Audit Ready.
Sales / Dispatch	• Priority Allocation to Priority Orders. • Expiry Alert / Warehouse Notice for short-dated items. • Dispatch 50/50 (SO) / Store Allocation / Fresh Shelf. • Issue Delivery Note.

Order-to-Cash (O2C) Workflow

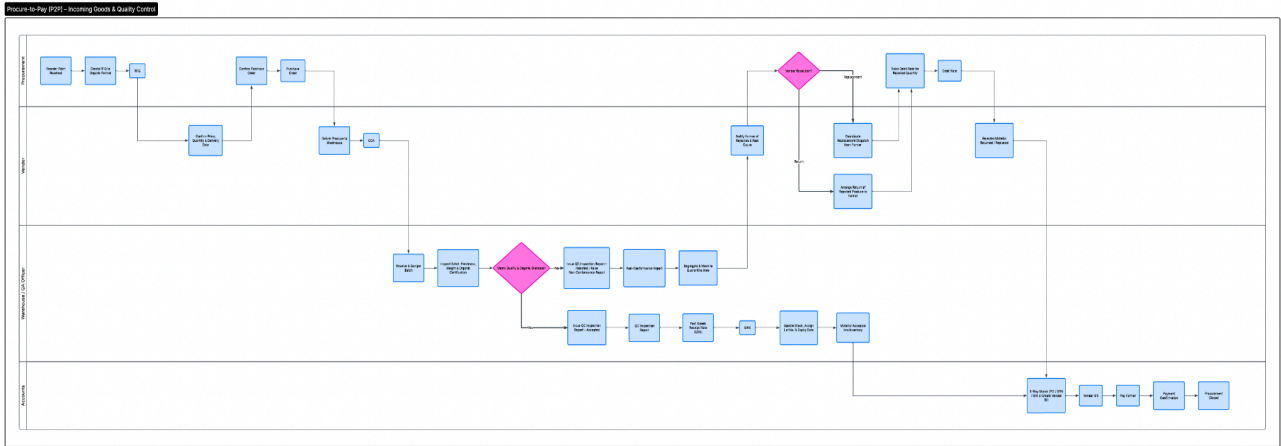

The Order-to-Cash cycle handles customer order capture, credit checks, inventory reservation, picking/packing, delivery, and two-stage payment collection (50% advance / 50% delivery).

Department / Role	Process Steps & Operational Flow
Customer	• Submit B2B Order Placement via portal.
Sales Team	• Check Availability of stock. • Confirm Sales Order.
Warehouse & Dispatch	• Stock Assessment: Check if required items are in stock. • If Stock Available: Pick & Pack (FEFO by Expiry) → Freshness / Quality Check → Dispatch & Shipment. • If Stock Unavailable: Back Order Processing / Purchase Requisition → Procure / Produce → Resume Pick & Pack.
Accounts / Finance	• Receive 50% Advance Payment. • Generate Commercial Invoice / Proforma. • Verify Collection of remaining 50% Payment on delivery. • Mark Sales Order Closed.
Documentations	• Generate / Maintain: Quotation, Sales Order Confirmation, Commercial Invoice / Proforma Invoice, Delivery Note / Packing List, Payment Receipt, Customer Feedback.

Procure-to-Pay (P2P) - Incoming Goods & Quality Control Workflow

The Procure-to-Pay process covers vendor sourcing, RFQ creation, purchase order generation, goods receipt, strict quality inspection (pass/fail handling), inventory putaway, and vendor bill settlement.

Department / Role	Process Steps & Operational Flow
Procurement	- Requisition Received → Procurement Planning → Create RFQ (Request for Quotation). - Receive Vendor Quote → Vendor Evaluation & Selection → Issue Purchase Order (PO). - Goods Received Note (GRN) Verification → PO Matching & Approved for Payment.
Vendor / Supplier	- Receive RFQ → Submit Vendor Quote. - Receive PO → Dispatch Goods & Supply Items.
Warehouse / Quality Control	- Incoming Goods Arrival & Physical Inspection. - Batch / Lot Creation & Expiry

Department / Role	Process Steps & Operational Flow
	Verification. ● Quality Gate Evaluation: ○ If Accepted: Store in Central/Regional Warehouse → Putaway & Stock In → Register Master Stock. ○ If Rejected: Initiate Return Material Authorization (RMA) / Rejection Notice → Quarantine / Return to Vendor → Adjust PO / Request Replacement. ● Generate Goods Received Note (GRN).
Accounts / Finance	● Receive Vendor Invoice (3-Way Matching: PO, GRN, Vendor Invoice). ● Schedule & Process Vendor Payment → Issue Payment Voucher & Credit Settlement.
